Forecast For Wales
Issued by Met Office Exeter
at 0400 on Friday 08 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Outbreaks of rain, sleet, and snow, possibly heavy.

Today:
Rain, sleet, and snow across the north of the country and western coastal areas to start, with some heavy outbursts. Turning more widespread by the afternoon, remaining persistent in northern parts. Feeling cold, with a continued risk of ice. Maximum temperature 4 deg C (39 deg F).

Tonight:
As the remainder of the wet, wintry weather clears through the evening, cloud slowly clears overnight, leaving a dry night with clear spells. Another cold night, with risk of ice. Minimum temperature -3 deg C (27 deg F).

Saturday:
A frosty start, leading to a dry and sunny day across the region, but feeling cold with a continued risk of ice. Cloud increasing overnight, though remaining dry. Maximum temperature 5 deg C (41 deg F).

Outlook for Sunday to Tuesday:
Milder temperatures into Sunday, as it becomes cloudier with outbreaks of drizzle. Turning unsettled Monday, with stronger winds and occasional rain, heavy at times. Persistent rain throughout on Tuesday.
